

ECS Water Control specialises in delivering high quality, reliable and cost effective engineering solutions to the water utility and related environment agencies and organisations, we specialise in the design, fabrication and construction of water and environmental processing and management projects.

ECS offers a full turnkey project managed service for mechanical and electrical installations including managing civils contractors and supplying pipework, fabrication, control and automation work to ensure that every installation is installed and commissioned to the highest standard. Existing clients include the majority of the UK Water Utility companies, Government Agencies and Internal Drainage Boards.

Replacement of 3T Flap Valve

Case Study: 001 Replacement of 3T Flap Valve

Client: Environment Agency
 Location: Berkley Pill
 Date: 2008
 Value: £40,000

Supply and install a 3 tonne flap valve and frame and grout to the headwall. The site was 1.5 miles from the nearest road making the logistics of transporting equipment and personnel extremely difficult.

This installation was carried out under tidal conditions and consequently the working time was restricted. However the project was completed within 3 working days to the satisfaction of the client.
